First Aid:

In case of eye contact: Flush immediately with water & seek medical attention.

In case of ingestion: Do not induce vomiting, simply drink a large glass of milk and consult your physician.

Instructions for Use:

Lubricate equipment at least twice daily, using the equipment manufacturers' recommended nozzles. Apply enough lubricant that it flushes out of the far side of the joint/hinge. Repeat as often as required by your Infection Control Protocol (suggested Protocols available on request). Always lubricate at the end of the day and before autoclaving.

Recommended Uses:

- Disinfect and lubricate: All high speed turbine handpieces, airmotors, low speed attachments and heads, any other equipment requiring lubrication and disinfection.
- Disinfect any equipment where the use of a water-based product would be detrimental.
- Lubricating any equipment to protect it and extend the life of the equipment.
