

SteriTech Disinfecting Handwash

(NEW FORMULATION!!) User-friendly Disinfecting Hand Wash

SANS 636
Permit number
7333/10881

Available sizes:
500mL Dispensers;
500mL Refills; 5L; 20L
Dilution Factor:
Ready-to-Use

In production as at 01/01/2014

Safe:

Non-Toxic, Non-Caustic, Non-Staining, Non-Irritant, Non-Carcinogenic and Biodegradable.

Amphoteric formulation:

Gentle on the skin meaning significantly less discomfort and/or inflammation.

Added Emollients:

Replaces lost natural skin oils to leave hands feeling soft.

Non-Oily:

Hands are dry, non-greasy and not slippery, so ability to handle instruments is never impaired.

Pleasant fragrance:

No user aversion to the product meaning higher Infection Control Standards are maintained.

Antimicrobial Efficacy:

SteriTech Disinfecting Handwash (New Formulation) has been tested effective by the SABS according to SANS 5261:2009 and SANS 636:2009.

In addition, the active ingredient has proven efficacy against the following organisms:

Bactericidal:

Pseudomonas aeruginosa, *Staphylococcus aureus*, *Escherichia coli*,
Enterococcus hirae, *Mycobacterium tuberculosis*.

Virucidal:

Hepatitis B & HIV

Fungicidal:

Candida albicans, *Penicillium verrucosum*, *Cladosporium cladosporoides*,
Absidia corymbifera and *Aspergillus niger*.

Active Ingredient:

SteriTech Disinfecting Handwash (New Formulation) contains Bis (3-aminopropyl) dodecylamine at a level of 0.75%.

First Aid:

In case of eye contact:
Flush eyes thoroughly with water. Redness might occur, but should disappear within 1 hour. Should it persist, consult your physician.

In case of ingestion:
Do not induce vomiting, wash out mouth then drink a large glass of water and consult your physician.

Instructions for Use:

Wet hands and dispense approximately 5mL (one pump) of **SteriTech Disinfecting Handwash** into the palm of your hand. Work into a lather & spread over hands and wrists, ensuring a 1 minute contact time. Always use a brush to clean underneath fingernails. Rinse well under running water. Dry hands thoroughly. Repeat as often as required by your Infection Control Protocol (suggested Protocols available on request).

Recommended Uses:

- Cleaning and disinfecting hands.

PPE Requirements:

None Strictly Necessary

But OHSA requires the use of eye protection & good ventilation when mixing, handling or discarding chemical disinfectants, and HICPAC Guidelines recommend the use of disposable plastic aprons & latex gloves when mixing, handling or disposing chemical agents.
